Living Colors

Interpon is the stand-out performer for architects and fabricators looking to bring their creations to life and leave a lasting legacy to inspire future generations. This means providing the colors and finishes to make your creations look amazing, for long into the future. Our in-house color experts use deep insight and scientific research to anticipate and predict movements in trends that affect color and coating choices for architectural applications. We have drawn on the knowledge of our global Aesthetics Centre, along with our own Australian insights, to produce this residential and industrial powder coatings collection – Living Colors.

The Interpon Ranges

Interpon 610

Interpon 610, Interpon 700 ranges feature higher transfer efficiency, excellent coverage and high levels of damage resistance, and are available in an extensive selection of brighter colors, ripples and textures.

Interpon D1000 / Interpon D1000 Excel™

The D1000 is a highly durable range of powder coatings. Interpon D1000 Excel™ has been developed to improve on the benefits of D1000 for applications over porous substrates, such as hot dip galvanised steel and castings, providing greater application tolerance and improved film appearance, while still suitable for aluminum and steel substrates.

Interpon A2000

For automotive trim components, Interpon A2000 travels around the world to protect and decorate vehicles for the most demanding OEM manufacturers. A2000 powders are designed for success as exterior and interior applications.

Redox for Steel Substrates

Interpon Redox primers provide a total corrosivity solution, enabling products to withstand whatever the world can throw at them, and remain fully operational long into the future.

Transparency and reliability

Creating futures that last

You can rely on us. Our Interpon D1000 range delivers on its promised durability levels in terms of color retention and film integrity.

- Offering up to 10 years global warranty on the coating performance when applied by an Interpon D Approved Applicator.
- Meets the performance requirements of AMAA 2603.

Building a sustainable future

The Interpon D1000 range is a family of products that is not just helping us to imagine the future; it is also protecting it. Backed by an Environmental Product Declaration (EPD), the raw materials, manufacture and transportation associated with creating Interpon D have been assessed by an independent third-party for transparent sustainability credentials.

Color Freedom

Color and finish are a crucial element of your design, which is why we've created our **made-to-order color service**. For smaller projects down to 20kg, Interpon MiniB™ and Interpon MiniB™ Micro provides fast service on small batch made-to-order colors that are specific to your needs. Some conditions do apply such as choice of color and product. Please contact the Interpon Customer Care Team for additional advice.

Interpon D Approved Applicators

The Interpon D Approved Applicators Network has been designed to ensure the Interpon solution you choose is applied correctly and meets the warranty requirements to local and international standards. To view all Interpon D Approved Applicators please visit specifyinterpon.com.au.

How to Specify Interpon Powder Coatings

For your project, it's important to use the correct product. That's why we make specifying Interpon powder coatings easy. Simply:

- Nominate the Interpon product. e.g. Interpon D1000.
- Nominate the color, finish and product code. e.g. Anodic Natural Matt GY235A.

Then to find your nearest Interpon applicator, please contact your Interpon representative or the Interpon Customer Care Team.

Interpon®

Care and Maintenance

Over time with exposure to the elements, powder coatings may show signs of weathering such as loss of gloss, chalking and slight color change. But regular cleaning will minimize the effects and remove dirt, grime and other build-up detrimental to all powder coatings. Using a solution of warm water and nonabrasive, pH neutral detergent solution, and rinsing surfaces after cleaning, is the best way to protect the value of your asset.

Category (AS4312)	Corrosivity Level	External	Internal	Required Cleaning*
C1	Very Low	Alpine Areas	Offices, Shops	Every 12 Months
C2	Low	Arid, Rural, Urban	Warehouses, Sports Halls	Every 12 Months
C3	Medium	Coastal (Bays)	Food Processing Plants, Breweries	Every 12 Months
C4	High	Sea Shore (Calm), Swimming Pools	Swimming Pools, Livestock Buildings	Every 6 Months
C5	Very High	Sea Shore (Surf), Offshore	Heavy Industrial, Chemical sites	Every 3 Months
CX	Extreme	Shoreline (Severe Surf)	Adjacent to acidic processes	Every 3 Months

*Refer Interpon Powder Coatings – Care and Maintenance sheet for further details.
